Grundlaget for Microservices og komplekse cloud arkitektur
Udfordringer for nutidens software testere

IT Days – Thursday

Spend 3 minutes in silence, thinking about your topic for the video assignment. What is the next step for your group? Is there something that you think is missing in your planned presentation? Is there something you would like to change?

One by one, present what you have considered. You have 1 minute.

Workshop:
- if possible, focus on finishing the screencast exercise
- Next, focus on getting your questions for the mandatory answered
- Focus on the difficult assignments – the easy ones you can do at home

Workshop
